

French

Learning a modern foreign language is a liberation from insularity and provides an opening to understanding other cultures that allows people to transcend barriers and connect to humans on a deeper level. At WNA our teaching of French will give children an opportunity to be curious, problem solve and express themselves. This will be taught explicitly by a specialist French teacher in order to ensure that children are given the best opportunities to respond to and communicate with one another accurately and in complex and meaningful ways– both written and verbal. Implicitly, ideas, words and concepts will be revisited by the class teacher who will be a part of all French lessons as a learner and an additional adult. Positioning adults as learners within the classroom will help to instil a culture of learning languages and their processes, whilst modelling how challenges can be overcome. This culture of overcoming challenges will provide a foundation for learning further languages, equipping children with the skills to become global citizens whilst unlocking opportunities to live, work and study in other countries.
